✓ SECURITY

Stolen Vehicle Recovery (SVR) – how it works

- If your vehicle is driven without the ADR tag, you will receive an alert, and our SOC will call you for verification.
- Press the button on your ADR tag to activate Secure mode (Smart alarm). In case of an unauthorised movement or towing, you will receive an alert. Call our SOC to report theft if your vehicle is stolen.
- If the Cobra Telematics device has been sabotaged, our SOC will call you to verify if the vehicle is stolen.
- If you discover your vehicle is stolen, call our SOC to report theft.

Upon confirmation of theft, our SOC will initiate the SVR process, tracking the stolen vehicle and coordinating with the police for swift recovery.

NCD PROTECTION

With our world class Safety & Security product, you can drive with confidence knowing that your vehicle and NCD are protected. **If your vehicle is stolen and not recovered, we will compensate you with RM5,000 to cover your NCD loss.** With our NCD protection guarantee, you're not just investing in security – you're investing in peace of mind and financial security. Terms & conditions apply.

✓ SAFETY

eCall Voice - how it works

Automatic crash alert & response (eCall)

In a crash, every second counts. Connex S5 Plus ensures that you receive rapid assistance. In case of an accident, eCall is automatically activated. The Cobra telematics device will automatically send a crash alert (location, time, direction & severity) and make a voice call to our SOC via the voicebox.

- If the crash is serious and even though there is no response from the driver or occupants in the vehicle, our SOC will call MERS 999 for the nearest emergency vehicles (ambulance and police) to be dispatched to the crash location as fast as possible.
- If the crash is not serious, our SOC will speak to the driver in the vehicle via the voicebox to check if assistance is required.

Emergency assistance (Manual eCall)

Unexpected events can happen at anytime. Whether you require medical attention or witness an accident that requires medical assistance, just press the SOS button on the voicebox. The device will send an alert and make a voice call to our SOC via the voicebox.

Roadside assistance (bCall)

Whether you're out of fuel, your tyre is flat or your battery is dead, just press the bCall button on the voicebox and speak to our SOC. We will dispatch the necessary assistance to get you back on the road.

Accident reconstruction report

Full trip details of the accident.

VIP ASSIST

- Unlimited towing to your preferred workshop anywhere in Malaysia.
- Free labour charge for repair on spot service (up to RM300 per incident) such as flat tyre change, flat battery charge/replacement or fuel delivery.

✓ MOBILE APP & WEB

Stay safe and connected with our app and web features – automatic driver recognition, smart alarm, find my car, speed alert, trip review and more.

Note: All features and descriptions are subject to change without prior notice. Terms & conditions apply.
